

CATCHING MORE FLIES, FASTER

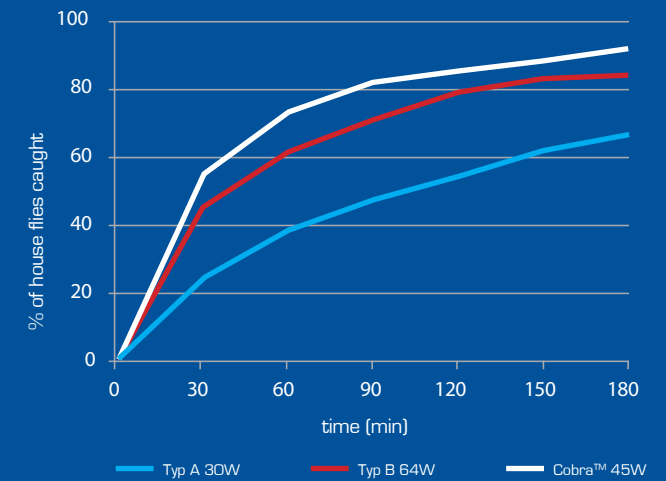

Genus® | COBRA™

Using patented TT™, Genus® Cobra™ produces the fastest flying insect catch when compared against other fly traps of similar size.

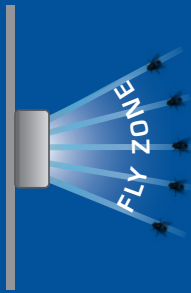

Mean catch of the Cobra™ 45 Watt translucent trap compared with two leading competitor units over a three hour period.

Cobra™ caught 74% of flies within one hour

INNOVATION IN ACTION

Genus® | COBRA™

Proven in laboratory tests, Translucent Technology™ makes Genus® Cobra™ the most effective flying insect control unit of its kind, consistently outperforming units by offering more than twice the UVA light output.

The Genus® Cobra™s translucent cover and internal reflector panels give 'all-round' UVA transmission and fewer blind spots for a larger, 180 degree UVA footprint and maximum attraction area. It is even effective against smaller, hard to catch species like Fruit Flies.

In public areas, Genus® Cobra™ provides silent, discreet, out of sight control with Translucent and Flystar Grey cover options to complement any décor.

For back of house locations, the option of 30 and 45 Watt UVA output and the IP45 certified Genus® Cobra™ JET unit wet-wash areas makes it the ideal solution in any operating area.

Easy access 'hands-free' servicing and wipe-down cleaning ensure continuous assured control and smart, hygienic appearance at all times.

All Genus® Cobra™ units come with a full one year warranty.

Features & Benefits

- Translucent Technology™ allows 180° dispersal of UVA light increasing flying insect catch
- Sideways opening front with quick release fascia for easy & fast servicing
- Wipe clean slim line design for smart, hygienic appearance
- Available with a translucent or grey fascia cover
- Optional IP45 rated unit for use in wet & wash-down areas
- HACCP compliant control board system with large catch area (175 sq.in. / 1127 sq.cm)
- Certified to World Wide standards for assured regulations compliance
- Full one year product warranty
