

Xlure RTU

The Xlure RTU is a ready to use diamond trap containing nature identical pheromones for attracting stored product flying insects. Xlure RTU diamond traps can be used as part of comprehensive or simple monitoring programmes in food production and storage. Designed to target *Plodia/Ephestia* species with the option of choosing one of our combo traps that include additional pheromones.

Benefits

- Precision dosed pheromone and food attractant incorporated into glue for dual-action insect attraction
- Pherogel™ technology used to ensure the steady release of pheromones
- Traps multiple insects, reducing labour costs of handling individual pheromone dispensers
- Insecticide free and non-toxic
- Ready to use and disposable, therefore prevents possible contaminations from nicotine, pesticides, scented lotions etc
- High quality cardboard with printed grid for easy insect counting
- Metal detectable to prevent entry into food production lines
- Data table to record weekly insect counts
- Available with wall hangers that hold the trap away from the wall, allowing airflow to move the pheromone through the trap for a broader reach
- Available in three pheromone combinations depending on monitoring requirements

Target insects

Where to use

Pantries, grocery stores, supermarkets, pet food stores, food processing plants, food storage warehouse, mills and bakeries.

Application method

Assembly

The Xlure RTU is ready to use. Open the trap and push the two ends in to secure in place. Insert the hanger and suspend.

Where to place/distance

- Place approximately 1.5 - 2 metres high from the floor. In a small kitchen or storage unit one trap is sufficient to cover the area.
- In larger factories or warehouses place one trap every 100 square metres. When trying to pinpoint infestations place more traps around fixtures and equipment.
- The traps can be hung from any structure or wall. If using with Dismate ensure that the trap is placed at least two metres from the Dismate dispenser.

Replacement

Replace every 6-8 weeks unless the trap is full earlier.

Storage

The traps should be stored in their sealed foil bag, in a cool dry place for a shelf life of 12 months. If longer storage is required store in a fridge or freezer.
